

Directions : Each of the following sentences has word(s) underlined. Read the sentence carefully and find which word class the underlined word(s) belong(s) to. Indicate your response on the Answer Sheet accordingly.

36. Adders are the only poisonous snakes found across Britain

- (a) Noun
- (b) Adjective
- (c) Adverb
- (d) Determiner

37. She spoke to him once since he has been in town

- (a) Adjective
- (b) Adverb
- (c) Conjunction
- (d) Preposition

38. I don't really want to go. Besides, it's too late now

- (a) Adjective
- (b) Adverb
- (c) Preposition
- (d) Conjunction

39. Look at that man over there

- (a) Adverb
- (b) Conjunction
- (c) Determiner
- (d) Article

40. The plane is ready for take-off

- (a) Noun
- (b) Conjunction
- (c) Verb
- (d) Gerund

Directions : In this section, you have a short passage. After the passage, you will find some items based on the passage. Read the passage carefully and answer the items based on it. You are required to select your answers based on the contents of the passage and the opinion of author only.

We live in a time when globalisation is rapidly encompassing travel, information, trade and investment. The internet ties people together in ways unimagined a few years ago. The globalisation of health, however, remains an elusive goal, similar to the globalisation of economic well-being. Laurie Garrett, in *The Coming Plague*, describes an unwelcome form of globalisation: the globalisation of disease. Garrett examines the recent history of emerging diseases such as AIDS, Ebola, Hantavirus, Rift Valley Fever, Legionnaires' disease, and others. She also explains the resurgence of familiar diseases like tuberculosis, cholera, and pneumonia as a consequence of the widespread and unwise use of antibiotics. Many of the new diseases are clearly linked to changes in land use, which brings humans into close contacts with rodents or other animals that harbour viruses previously unknown to medicine and often deadly to humans. Resurgent diseases, by contrast, are a creation of our medical practice. By treating people with antibiotics without

restraint, we unknowingly select strains that are immune to the antibiotics and that pass on their resistant genes to unrelated bacteria by way of plasmid transfer. The heroes of her book are the women and men on the frontlines of epidemiology. Garrett makes a plea for a greater commitment from our universities, medical schools, and government agencies to train workers who will be capable of recognizing new diseases and who will be able to move about equally well in the laboratory, the hospital and the field in pursuit of knowledge and public-health intervention around the world.

41. What according to the passage is the 'unwelcome form of the globalization' ?

1. Globalization of the diseases
2. Elusive goal of globalization
3. History of fatal diseases
4. Selective use of antibiotics

Select the correct answer using the code given below :

- (a) 1 only
- (b) 2, 3 and 4
- (c) 3 only
- (d) 1 and 4

42. According to the passage, globalisation of health has become imperative due to

- (a) the globalisation of diseases
- (b) public health intervention
- (c) the creation of new medical systems
- (d) the indiscriminate use of antibiotics

43. According to the passage, resurgent diseases are affected by :

1. Medical practices
2. Overuse of antibiotics
3. Emergence of new strains

Select the correct answer using the code given below :

- (a) 1 only
- (b) 2 only
- (c) 1 and 3 only
- (d) 1, 2 and 3

44. According to the passage, many new diseases are emerging due to change in land use because

- (a) humans are coming in contact with unfamiliar viruses
- (b) urbanisation makes pathogens proliferate
- (c) humans become adaptive and pass on their genes to related bacteria by way of plasmid transfer
- (d) humans are inadvertently releasing new viruses

45. What is the meaning of the word "epidemiology" in the passage ?

- (a) The historical study of the spread of diseases
- (b) The scientific study of the spread and control of diseases
- (c) The scientific study of the invention and uses of drugs
- (d) The scientific study of the uses of drugs
