49. S₁: The woman who lives a normal life is able to check the swelling conceit and egotism of her menfolk simply because her outlook is so different.

S₆: And both ranges of interest make her what only fools deny her to be, namely, essentially practical, her eye is steadily fixed on the concrete thing and she mistrusts that chasing of the wild goose, which is one of the chief pastimes and delights of man.

P: She is primarily concerned with little ordinary things, the minutiae of talk and behaviour e.g., on the one hand and with very big ones, the colossal elementary facts of life, such as birth, mating and death on the other.

Q: The first are personal and particular, whereas the second, those enormous facts about life which women are never allowed to lose sight of, are, of course, universal, meaning just as much in the Fiji Islands as they do here.

R: Her interests are at once narrower and wider than those of men.

S: It is more personal and yet more impersonal.

S₆: 'Carbonic acid' is the old name for it, but it is more proper to name it, when it is out of the water, 'carbon dioxide'.

P: The liquid is plain water, as you will find out if you are too slow about drinking.

Q: You will see that it is separating into two different things, a liquid and a gas.

R: The gas is so heavy that you can fairly drink it from the glass and it has, as you know, a tingle-tangle taste.

S: The other is a heavy, sour and invisible gas that slips up through the water in little bubbles and collects in the empty half of the glass.

52. S₁: There are, I think, several factors that contribute to wisdom.

S₆: You have not time to consider the effect which your discoveries or inventions may have outside the field of medicine.

P: This has become more difficult than it used to be owing to the extent and complexity of the specialised knowledge required of various kinds of technicians.

Q: Of these I should put first a sense of proportion: the capacity to take account of all the important factors in a problem and to attach to each its due weight.

R: The work is difficult and is likely to absorb the whole of your intellectual energy.

S: Suppose, e.g., you are engaged in research in scientific medicine.

54. S₁: If you want to film a scene in slow motion, you run the camera twice as fast as usual, which sounds ridiculous but isn't.

S₆: On the screen, everything appears at half the speed at which the camera recorded it when it was filmed.

P: If you are filming in slow motion, however, the camera runs at twice the normal speed, yet, in spite of this, the projector which shows the film will be run at the normal speed and this means that the projector will show the film at half the speed at which it was photographed.

Q: This is because the camera which took the pictures and the projector which shows them run at the same speed.

R: When a film camera is running at normal speed, it takes twenty-four pictures a second.

S: When the film is run through the film-projector, twenty-four pictures a second appear on the screen.

S₆: But the question is, have we forgotten his legacy in modern India?

P: It searches our collective psyche like an unrelenting laser beam.

Q: Most importantly, the play questions whether religion and politics can fuse together in modern India.

R: Gandhiji had both the spiritual and political dimensions that we so lack today.

S: Prasanna's 'Gandhiji' staged recently by the National School of Drama is one such play.
